## Environmental Policy

It is the policy of G & B Projects Company to take a close and responsible interest in the environmental impact of all operations in which they are involved.

The firm will therefore seek to act in accordance with good practice and, wherever possible, endeavour to enhance the quality of the environment by ensuring:

- That the partners and staff of the firm ensure that areas for which they are responsible comply with current prescribed environmental standards and will regard those standards as a minimum requirement.

Particular attention will be paid to the following areas:

- The effectiveness of maintenance operations in areas which are likely to present problems to the environment.
- The control of substances that may be hazardous to health and/or the environment.
- The use of energy in the firm's premises and the adoption of conservation measures to reduce energy consumption.
- The prevention of unnecessary waste production and the control, re-use and recycling of waste where possible.
- The briefing of all staff to ensure awareness of operational and maintenance standards and the associated environmental obligations and considerations.

***By implementing and managing this policy, it is G & B Project Company's aim to contribute to the effective improvement of environmental performances at its premises and in all its operations and activities.***
